

MagnaView UDC-viewer is OUT!

How can MagnaView help you?

MagnaView develops innovative tools for visual analysis and powerful presentation of various types of information.

For UDC, MagnaView has developed an application which gives you interactive and visual access to the complete content of the UDC Master Reference File.

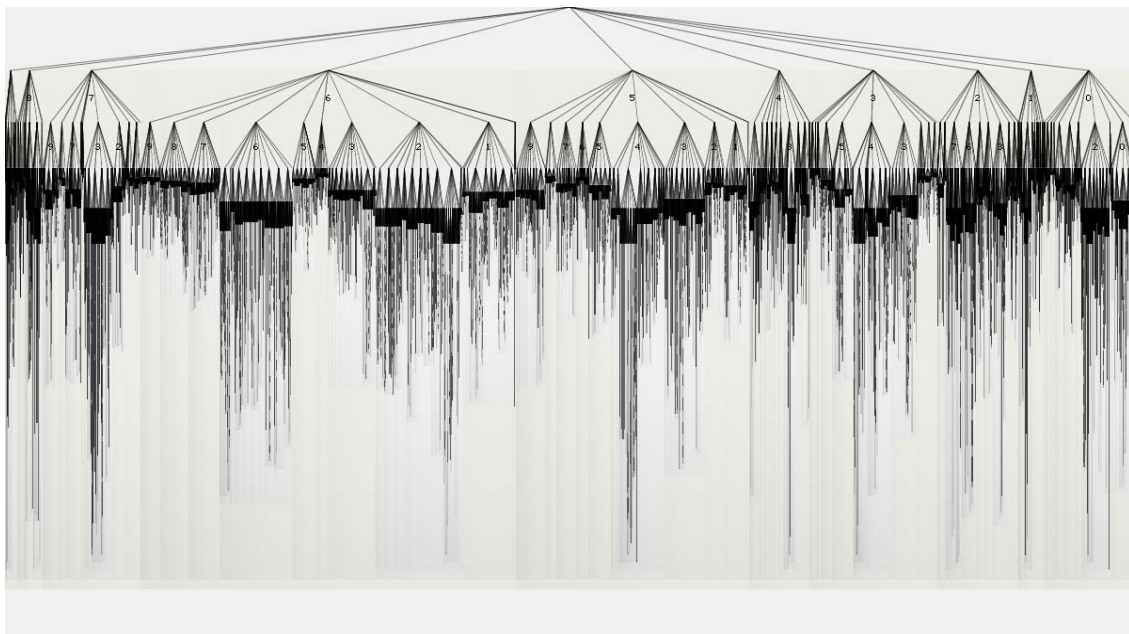

What does the application offer?

MagnaView UDC-viewer offers you instant and visual access to the complete content of the Master Reference File (MRF), i.e. to all records and all tags. UDC-viewer makes use of a pre-processed and extended version of MRF and gives you more than 20 different views, each including the complete MRF or part of the MRF like the Main Table.

MagnaView visualizes the data of the MRF in various views and allows users to use the MRF interactively. The user can, for example:

- Zoom: user can zoom in/out to a specific part of the data by double-clicking;
- Filter: user can exclude part of the data;
- Hide or show details;
- Make a selection of the data by dragging the mouse;
- Select by search for values of specific tags and by simple string search;
- Link to Google, allowing internet search of all terms in MRF.

What is included in MagnaView UDC-viewer?

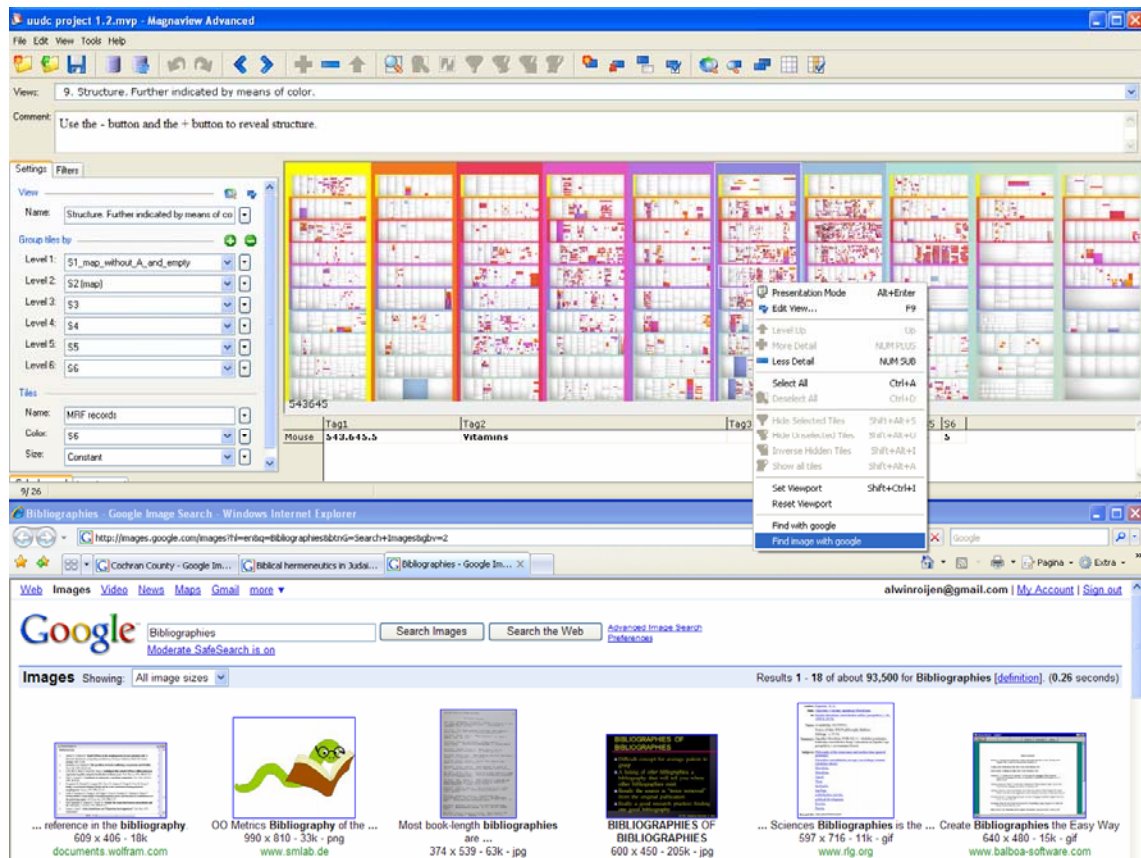

Included in MagnaView UDC-viewer 1.0 are:

- One named-user license of the powerful MagnaView Viewer (version 3.1).
- The MagnaView UDC-project with at least 20 different views.
- The Master Reference File in an enriched and compressed format for direct use with MagnaView and with the MagnaView UDC-project.

Moreover, this offer includes the possibility to order additional MagnaView software like the Explorer, Designer and Designer Pro in 2007 with a discount of 20%. For this extra discount, send an email to info@magnaview.nl for your coupon code.

System requirements:

- To use MagnaView UDC-viewer, the minimum requirements are Windows 2000 or higher, a 1GHz processor, 256 Mb RAM and 50 Mb of free disk space.
- MagnaView supports Windows Vista.

Example: Internet search using Google

How do I order MagnaView UDC-viewer?

A single named user-license for MagnaView UDC-viewer costs €550,- (excl. BTW/VAT). MagnaView UDC-viewer can be ordered by following this link to MagnaView's webshop at cleverbridge.com

<https://www.cleverbridge.com/131/?scope=cart&cart=21155>

(If you encounter problems following this link, copy it to your browser).

Only UDC MRF licensees, i.e. institutions or individuals who have purchased and are paying one of the UDC MRF licenses (<http://www.udcc.org/Pricelist.doc>) can order MagnaView UDC viewer. If there are any questions in relation to the UDC MRF license purchase or license validity, please clarify this with the UDC Consortium (mail@udcc.org) prior to ordering of the MagnaView product.

1. Follow the link to order MagnaView UDC-viewer in the MagnaView web shop;
2. Please note that you can either
 - a. pay directly in the web shop by means of credit card, or
 - b. get a quote, which you can sign and return, after which you will receive an invoice to pay by means of banking transfer.
3. After completion of the ordering process and the installation of MagnaView, send a request to info@magnaview.nl to obtain the MagnaView UDC project file and the specific UDC-files. In your request, please provide the affiliation that is used by the UDC Consortium;
4. After receiving confirmation from UDCC, MagnaView will make the MagnaView UDC project file, the UDC-files and a short manual available to you.

We hope to welcome you as a user of MagnaView UDC-viewer.
